Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 21, 2007 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is anticipated under 35 U.S.C. 102(b) as being anticipated by JP03059049A (herein referred to as Yamazaki).

Yamazaki teaches a composition for molding comprising 40-80wt% polypropylene, 5-35wt% polyethylene, and 15-25wt% ethylene/alpha olefin which is useful for making molded products such as furniture and bumpers (abstract). While Yamazaki does not teach the "for use" limitation, said limitation is (find case law).

With regard to the limitation that the sheet is vacuum or pressure formed, it is noted that the method of making a product does not patentably distinguish a claimed

product from a product taught in the prior art unless it can be shown that the method of making the product inherently results in a materially different product. In the present application, no such showing has been made.

With regards to the "no droop under its own weight" limitation, the position is taken that the composition of Yamazaki inherently meets said limitation since the composition of Yamazaki is compositionally identical to the claimed composition.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim states the composition comprises 5-30wt% "polypropylene" mixed with polypropylene. It is unclear what is meant by polypropylene mixed with polypropylene. Based upon the originally filed claims, it is believed the 5-30wt% "polypropylene" was intended to be "polyethylene." The claims have been examined based upon this assumption.

Response to Arguments

Applicant's arguments filed December 27, 2007 have been fully considered but are moot in view of the new grounds of rejection.

Conclusion
